	Application No.	Applicant(s)				
	10/645,136	LARSON ET AL.				
Office Action Summary	Examiner	Art Unit				
	Pedro Philogene	3733				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 26 Ju	<u>ıly 2007</u> .	•				
2a) ☐ This action is FINAL . 2b) ☐ This						
3) Since this application is in condition for allowar	nce except for formal matters, pro	secution as to the merits is				
closed in accordance with the practice under E	x parte Quayle, 1935 C.D. 11, 45	53 O.G. 213.				
Disposition of Claims						
 4) Claim(s) 1-13 and 15-27 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-13,15-27 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. 						
Application Papers						
9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3733

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13,15-27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 7,014,608. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claims 1 are to be found in claim 1 (as it encompasses claims 2, 3), claim 4, claim 5 (as it encompasses claims 6-12), claim 13 (as it encompasses claims 15-16). The difference between claims 1 of the application and claims 1,4,5,13 of the patent lies in the fact that the patent claims include many more elements and are thus much more specific. Thus the invention of claim 1, 4, 5 and 13 of the patent is in effect a "species" of the "generic" invention of claim 1. It has been held that the generic invention is "anticipated" by the "species". See in re Goodman, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claim 1 is anticipated by claims 1, 4, 5 and 13 of the patent, it is not patentably distinct from claims 1, 4, 5, and 13.

Application/Control Number: 10/645,136

Art Unit: 3733

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-12,15-18, 20-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mayer et al. (5,728,046) in view of Smith et al. (7,261,688).

Mayer et al disclose a retractor, as best seen in FIG. 1, comprising a frame (5) having a first guide receiving channel (20,21) a first tissue retaining wall (7); and a second tissue retaining wall (18,19) wherein each of the retaining walls has a substantially flat side, as best seen at 25,45, wherein one of the first tissue retaining wall and the second tissue retaining wall is coupled to the frame (5 as it encompasses arms 1,2,3,4,) as best seen in FIG.1 and a first guide (29) having an end, the first guide being sized and dimensioned to be received within the first guide receiving channel, the end being sized and dimensioned to be insertable into a first area of bone; as best seen in FIGS.1-3. The retaining wall has a curved bottom surface, as best seen in FIG.1. The retractor further comprising a frame (5) having a mechanism that holds the retaining walls apart from each other, wherein the first and second guide receiving channels (20,21) comprises slot disposed in the frame.

It is noted that Mayer et al did not teach of a first and second walls that are movably coupled and a hinge that joins the first and second walls and first and second walls that are nested relative to one another; as claimed by applicant. However, in a

Application/Control Number: 10/645,136

Art Unit: 3733

similar art, Smith et al evidence the use of a retractor with such characteristics to increase the size of the working channel while minimizing trauma to skin and tissue.

Therefore, given the teaching of Smith et al, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Mayer et al, as taught by Smith et al to increase the size of the working channel while minimizing trauma to skin and tissue.

With respect to the method claims, the method steps, as set forth, would have been obviously carried out in the operation of the device, as set forth above.

Allowable Subject Matter

Claims 13, 19 are allowed.

Response to Amendment

Applicant's arguments, see Remark, filed 7/26/07, with respect to the rejection(s) of claim(s) 1-24 under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Smith et al/Mayer et al.

Applicant's terminal disclaimer and fee Auth. Filed 2/1/07 were not approved, because the E-Signature was not proper. Applicant needs to re-submit both the terminal disclaimer and the Fee authorization with proper Signature.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was

Art Unit: 3733

within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro Philogene whose telephone number is (571) 272-4716. The examiner can normally be reached on Monday to Friday 6:30 AM to 4:00 PM.

Application/Control Number: 10/645,136
